

Biological objectives: DRAFT advisory committee members and affiliations

Approximately 50 members of a range of interest groups either volunteered or were recommended for membership on the Stakeholder Advisory Committee for development of biological objectives for Wadeable Streams. After reviewing this list and talking with representatives of some interest groups, the project has finalized criteria for selecting committee members and has also combined some areas that overlap, both in their areas of management responsibility and their suggested representatives. These decisions were based on judgments about how best to structure the Committee to accomplish its objective, which is to support two-way communication between other elements of the project (i.e., the State Water Board, other regulatory agencies, the technical team, & the Scientific Advisory Committee) and members of each interest group statewide.

The original proposed list of interest areas included:

- Agriculture
- Builders / developers
- Environmental protection
- Fire fighting
- Flood control / municipalities
- Hydropower and other electric utilities
- Land managers
- Manufacturing / effluent-dominated flows
- Mining
- Mosquito abatement
- Pesticide manufacturers
- Publicly owned treatment works (POTWs)
- Recreation
- Resource managers
- State permitted agencies
- Stormwater
- Tribes
- Water agencies

Several of these categories overlapped with others, when viewed from the perspective of the core functions of entities in each interest area, as well as how the biological objectives will be developed and implemented. The revised list of interest areas includes:

- Agriculture
- Builders / developers

- Environmental protection
- Fish hatcheries
- Flood control / municipalities / stormwater
- Hydropower and other electric utilities
- Management agencies (state and federal) (e.g., CA Dept. Fish & Game, CA Dept. of Water Resources, Bureau of Reclamation, Fish and Wildlife Service, & Forest Service)
- Manufacturing / effluent-dominated flows
- Mining
- Mosquito abatement
- Plant health (pesticide manufacturers)
- POTWs
- Recreation
- Water agencies
- Tribes

Potential Committee members were prioritized based on whether they:

- Represent a statewide or regional professional organization / association
- Are an employee of an affected agency, organization, or other entity
- Contribute to geographic coverage of as much of the state as possible

The following table includes the draft list of advisory committee members. Notes explaining the symbols attached to some names follow the table.

Name	Organization	Representing	Position	Phone	Email
Parry Klassen	E. San Joaquin Water Quality Coalition	Agriculture	Primary	559-646-2224	pklassen@unwiredbb.com
Pamela Silkwood	Grower-Shipper Assoc. of Central CA	Agriculture	Alternate		
Mark Grey *	Building Industry Assoc. of CA	Builder/Develop.	Primary	909-525-0623	mgrey@biasec.org
Cliff Moriyama	Consultant	Builder/Develop.	Alternate	916-215-2052	cm_consulting@comcast.net
